1. 載入資料

```
//載入資料
$.ajax({
  type: "GET",
  url: "js/HotelList.json",
  dataType: "json",
  async: false,
  success: function (data) {
    alldata = data.Hotels;
    console.log(alldata);
    sortData();
  },
  error: function () {
    alert("error");
  }
});
```

2. 資料重構

```
function sortData() {
  alldata.forEach(function (item, key) {
    // console.log(item.PostalAddress.City);

    var getRegion = item.PostalAddress.City;
    if (getRegion == "") {
      getRegion = "未分類";
    }
    if (counter[getRegion] == undefined) {
      counter[getRegion] = regionData.length;
      regionData.push(new Array());
      regionTitle[counter[getRegion]] = getRegion;
    }
    regionData[counter[getRegion]].push(item);
  });
  console.log(regionTitle);
  console.log(counter);
  console.log(regionData);

  console.log(Math.max(regionData));

  //旅館總數
  $("#numOfHotel").text(alldata.length);
  //縣市數量總數
  $("#numOfCity").text(regionTitle.length);
}
